

## 2024-2025 Medicaid Adult Behavioral Health Services Benefit Plan

<i>Service Code(s):</i>	<i>Services Included (Sorted by Alphabetical Order):</i>
H0040, H0040U1	<a href="#"><u>Assertive Community Treatment Program</u></a>
H2015HTHO, H2015HTHF, H2015HTHN, H2015HTU1, H2015HTHM	<a href="#"><u>Community Support Team</u></a>
H0035	<a href="#"><u>Partial Hospitalization</u></a>
H0038, H0038HQ	<a href="#"><u>Peer Support Services</u></a>
H2017	<a href="#"><u>Psychosocial Rehabilitation</u></a>

Codes / modifier combinations not mentioned for specialized services will be found within contracts.

For Medicaid services, Child services are available through age 21. Adult services are available from age 21 and older.

When state Medicaid coverage provisions conflict with the coverage provisions in a Trillium policy, state Medicaid coverage provisions take precedence.

Member and Recipient Services: 1-877-685-2415

Provider Support Service Line: 1-855-250-1539

### Person-Centered Plan Requirements & Guidance

Providers can use the PCP template or develop their own template, but the PCP *must* contain all the required elements: 1) Assessment of life domains; 2) Person-Centered Interview Questions; 3) An action plan; 4) An enhanced crisis intervention plan, and; 5) A signature page. The PCP should be based on a comprehensive assessment that examines the individual's symptoms, behaviors, needs and preferences across the life domains listed below. Additional info can be found on the [NCDHHS Person-Centered Planning Training](#) webpage (PCP Guide). See the [JCB #445 Timelines for Implementation](#) for the implementation requirements for the new PCP guidance and templates.

#### Life Domains (PCP Guide)

Each life domain should provide a written picture of what is currently happening, what the individual's vision for a preferred life is for that area, and what the provider is doing to support the individual to move closer to living their preferred life.

- *Daily Life and Employment Domain*: What a person does as part of everyday life.
- *Community Living Domain*: Where and how someone lives.
- *Safety and Security Domain*: Staying safe and secure (finances, emergencies, relationships, neighborhood, legal rights, etc.).
- *Healthy Living Domain*: Managing and accessing health care and staying well.
- *Social and Spirituality Domain*: Building/strengthening friendships and relationships, cultural beliefs, and faith community.
- *Citizenship and Advocacy Domain*: Building valued roles, understanding personal rights, making choices, sexual orientation, self-identification, setting goals, assuming responsibility and driving how one's own life is lived.

#### Person-Centered Interview Questions (PCP Guide)

These identify what the person wants to work on, what they would like to accomplish, their identified strengths, and any identified obstacles preventing them from reaching their goals.

#### Action Plan (PCP Guide)

The Action Plan section of the PCP includes the individual's long-term goal, short-term goals, and interventions or the action steps to be taken to achieve these goals. For each desired long-term goal, the Action Plan will include short-term goal(s) as well as interventions.

- *Long-Term Goal Development*: what motivates the person to engage in services and make changes. These are personal to that individual, often reflect one or more Life Domains, and typically take time to achieve. Ideally, long-term goals are oriented toward quality-of-life priorities and not only the management of health conditions and symptoms.
- *Short-Term Goals*: help the person move closer to achieving their long-term goals. They reflect concrete changes in functioning/skills/activities that are meaningful to the person and are proof they are making progress. Short-term goals build on strengths while also addressing identified needs from the assessment that interfere with the attainment of the valued, long-term life goal(s). Short-term goals are written in SMART (Specific/Straightforward/Simple, Measurable, Achievable, Relevant, and Time-Limited) language.
- *Interventions*: reflect how all team members contribute to helping the person achieve their short-term goals. Interventions are the specific tasks the provider and individual agree on. The language of interventions should include: WHO is offering the intervention/support, WHAT specifically will be provided or done (e.g., title of service or action), WHEN it is being offered – frequency and duration (e.g., once a month for 3 months), and WHY it is needed (i.e., how the intervention relates to the individual's specific goal).

### Enhanced Crisis Intervention Plan (PCP Guide)

A crisis plan includes supports/interventions aimed at preventing a crisis and the supports/interventions to employ if there is a crisis. It must include:

- Significant event(s) that may create increased stress and trigger the onset of a crisis.
- Early warning signs which indicate a possible upcoming crisis.
- Crisis prevention and early intervention strategies
- Strategies for crisis response and stabilization
- Specific recommendations for interacting with the person receiving a crisis service.
- Diagnosis and insurance information,
- Name and contact information for medical and mental health provider
- List of medications including doses and frequency, allergies, and other medical and dental concerns.
- Living situation and planning for any pets and people, etc. in case of a crisis if applicable.
- Employment/ Educational status and plan for notification if applicable
- Preferred method of communication and language.
- Names and contact information of formal and informal support persons
- Suicide prevention and intervention plan, behavior plan, youth in transition plan and Psychiatric Advance Directive (PAD), if applicable.
- Crisis follow-up planning to include: 1) The primary contact who will coordinate care if the individual requires inpatient or other specialized care; 2) Name of the person who will visit the individual while hospitalized, and; 3) Provider responsible to lead a review/debriefing following a crisis and the timeframe.

### Signature Page (PCP Guide)

Signatures are authenticated when the individual signing enters the date next to their signature. Check boxes left blank on the signature pages of the PCP will be returned as incomplete. A signature page must include:

- Person Receiving Services - Dated signature is required when the person is his/her own legally responsible person. A provider may not bill Medicaid for services until this signature is acquired if the individual is his or her own legally responsible person.
- Legally Responsible Person - Dated signature when the person receiving services is not his/her own LRP. A provider may not bill Medicaid for services until this signature is acquired, when applicable.
- Person Responsible for the Plan - Dated signature is required. Inclusion of the required information on the signature page of the PCP template by the Person Responsible for the Plan is also required for individuals under the age of 21 (Medicaid) or under age 18 (State) who are receiving enhanced services and are actively involved with the Department of Juvenile Justice and Delinquency Prevention or the Criminal Court System.
- Service Order/Confirmation of Medical Necessity - Dated signature is required, plus confirmation of medical necessity, indication of whether review of the comprehensive clinical assessment occurred, and indication if the LP signing the service order had direct contact with the individual.
